**SRISAK VISITPONG / PETER SK ONG**

# SVP COMPANY PROFILE SUMMARY

---

**SVP EQUIPMENT REPAIR AND SUPPLY COMPANY LIMITED** was formed as a joint venture between SVP Oilfield Services Limited and Oilfield Services and Supplies Pte Ltd (Singapore) in August 2001, between Srisak Visitpong and Peter SK Ong. The main objectives of the company are to better serve our customers' need in response to the projected drilling activities that are coming up in Thailand. The following are some of the advantages we foresee that can help our customers in Thailand

1. Reduce customers' dumb iron inventory.
2. 2 to 3 days turn-around of dumb iron repairs.
3. Highly trained and quality-conscious SVP employees.
4. Integrated down hole tool services and repair capability.
5. Directional mud motor components salvage and repairs.
6. Integrated assistance to customers on turnkey project.
7. Rental of available dumb iron tools to eliminate tedious AFE approval.
8. Cost saving in transport cost to and from Singapore and miscellaneous equipment.
9. Modification of stabilizer configuration to suit operational needs can be done with ease in Thailand.
10. Manufacture and repair Stabilizers hard facing, Cross Over Sub etc.
11. SVP repair and machine new API Rotary connections pending certification.

Srisak Visitpong has been serving in the Oil and Gas industries for the past 30 Years with amicable credential regionally and especially so in Thailand. He has got an all rounder experience in the Oil and Gas industries, which stretches from logistic support to completion for all the different stages of drilling operation. Srisak SVS Oilfield Services Limited in Thailand has served many MNC customers like Halliburton, Baker Hughes, Schlumberger, Smith Services, Chevron and many other local establishments with pride and full customer satisfaction. MM Logistic Co., Ltd which is wholly owned by Srisak Visitpong is accredited ISOQAR and the company can provide complete logistic support both locally and regionally.

Peter SK Ong has been serving in the Oil and Gas industries for the past 30 years. He started working for Shell Brunei in the offshore construction of drilling and production platforms for 3 years. Upon completion of Shell contract, he worked in the petrol chemical plant in Pulau Ayer Merbau in Singapore. He spent 3 ½ years working for Global Marine Drilling Company in Singapore on the construction of the drill ship, Glomar Robert F Bauer. He joined Christensen Diamond Company as a quality assurance engineer in the bit manufacturing plant in Singapore. He spent 15 years with Baker Hughes Inteq in the drilling system department in Singapore with vast experience in Mud motor technology and drilling tool service and repair. His last assignment with Baker Hughes was in BHEPS in Myanmar as a Cost / Logistic manager. Presently he is

the Director of Oilfield Services and Supplies Pte Ltd in Singapore. OSS specialized in all the different type of hard facing repair on stabilizer and drilling mud motor parts in Singapore. The following are the machinery available in Singapore to fully support SVP in Songkhla Thailand

- 9000 sq ft covered area with 5 ton overhead crane and 2000 sq ft outside storage area in Singapore
- 3 X 24” Churchill cylindrical grinding machine
- 1 X 24” Naxos Union outside cylindrical grinding machine
- 1 X 5 meter with taper attachment lath machine
- 1 X 4 meter Mazak lath machine with taper attachment
- 2 X 4 meter country with 14” hollow lath taper machine
- 1 X PT 13 break out unit with 20” extension bed, spinning tools and pushes pull.
- 3 X Milling machine capable of spiral milling of 18” stabilizer forging.
- 4 ton Toyota forklift
- 3 X stabilizer hard facing equipment and accessories.
- A wide range of stabilizers for sale and rental

SVP EQUIPMENT REPAIR AND SUPPLY COMPANY LIMITED was formed in August 2001 with the upfront of equipment investment cost nearing US\$ 200,000. We are committed to service all our customers in Thailand with impeccable services, safety consciousness and most importantly, quality being top on our list. We are committed to ensure that the services and quality of our products delivered are comparable to what our customer’s previous vendors in Singapore can provide. We will assure that there will be considerable cost saving in having the equipment repaired in Songkhla and Sattahip Thailand compared to it being done previously. The following are SVP machinery available in Songkhla and Sattahip Thailand and we plan to increase the equipment if the need arises so as to fully support Songkhla Thailand’s operation

- 3,000 sq meters open area compound including a 250 sq meters covered workshop area with 3 ton overhead crane.
- Full range of logistic support equipment like mobile crane forklift and etc.
- 1 X 24” Norton cylindrical grinding machine
- 1 X 36” Naxos Union outside cylindrical grinding machine
- 1 X 2 meter OD bearing grinding machine
- 1 X 1 meter JAS ID bearing grinding machine
- 1 X PT 13 break out unit with 13” extension bed.
- 1 X 3.5 meter 3” Hollow Spinder lathe machine with taper attachment
- 1 X 5 meter 6” Hollow Spinder lathe machine with taper attachment
- 1 X 6 meter 9” Hollow Spinder lathe machine with taper attachment

- 1 X 6 meter 13” Mazak Hollow Spinder lathe machine with taper attachment
- 1 X 6.5 meter 14” Hollow Spinder lath machine with taper attachment
- 1 X Stabilizer hard facing equipment and accessories.
- A wide range of stabilizer and drilling tools for sale and rental
- 1 X Operation / Technical Manager
- 2 X Workshop foreman
- 2 X Account / admin clerk
- 5 X Machinist
- 4 X Hardfacer
- 2 X QA/QC
- 4 X Labour

SVP Oilfield Services Limited intends to offer stabilizer rental and repair services and manufacture the drilling component or repair API Connections so as to better service our customers in Thailand. The stabilizer rental offers our customers the best possible solution to their need in Thailand by eliminating costly inventory on dumb iron parts. We are more than willing to work with our customers in their technical requirement for this equipment if given the opportunity. Our technical expertise in wear resistance on drilling parts will help our customers to save considerable operational cost.

### **Stabilizer Rental**

1. Offers a very competitive price in the Thailand market.
2. Is the most technically advanced
3. Offers more useful features
4. Saves them time and money
5. Offers our users better value per dollar spent
6. Provides an alternative way to realize a similar goal.

### **Stabilizer Repair**

1. Provides a service, which is presently not economically available in Thailand.
2. Is strengthened by a team with combined experience of 30 years.
3. Saves them time and money
4. Provides an alternative, cost effective way for our customers to realize a similar goal.

## **Repairing of Stabilizer and Milling Tools**

We perform incoming and final outgoing inspection on all stabilizers and equipment that come to our repair shop prior to the actual repairing.

1. Our repairing machinery is a state-of-the-art.
2. Our consulting practice will address these specialized areas:
  - Hardfacing with Amaloy (Crushed carbide) HF 1000
  - Hardfacing with Geo Thermal (Crushed carbide with Trapezoidal insert) HF 2000
  - Hardfacing with T2A (Tungsten carbide insert set in a powder spray deposit) HF 3000
  - Hardfacing with Techno Gina (Fused tungsten carbide in nickel chrome boron matrix) HF 5000
3. All stabilizer hardfacing will be ground to a tolerance of 0.015" below to the required size as specified by our customer.

## **Drilling tools service and repair:**

The team of well trained and mechanically inclined employees of SVP Ltd coupled with the availability of the Break Out unit in our workshop, we are able to supplement the urgent need of our customers to service tools on their behalf. Our employees are familiar with servicing of down hole motors, coring tools, fishing jars and bumper subs independently. We are more than willing to be trained by our customer's trainer so that their tool maintaining standard can be upheld.

## **Steel fabrication and specialized welding**

We are able to manufacture offshore baskets with full certification by the relevant authorities. We can provide services to convert manual elevators and spiders to pneumatic operated types in Songkhla Thailand workshop. This method will save considerable cost in modifying old existing handling tool equipment in Thailand.

Even though at this time our expertise is unique in the marketplace, we expect advances to be made and competitors to arise and offer similar services. We will meet this challenge by:

1. Hiring staff specialized in these new areas.
2. Increase our continuing education and training expense.
3. Adding complementary lines.
4. Market regular investments in new equipment.

## **Mud motor bearing components repair and rework.**

We have vast experience in reworking mud motor bearing assembly parts which not only saves considerable motor service cost but also increases the complete reliability of the bearing section during operation. We have championed Baker Hughes INTEQ mud motor reliability for the past 10 years and we are more than willing to share our experience with any of our potential customers.

In summary, under the leadership of Srisak and Perter, the company aims to provide the best service to all our customers in Thailand. We endeavor to assist our customers in whatever way we can so that it can be a seamless overall operation in Thailand. Please do not hesitate to contact us if we could be of further help in the future.
